JUNE 1980

ALVIN REVIEW COMMITTEE

Minutes of Meeting
April 24-25, 1980
Woods Hole Oceanographic Institution, Carriage House
Woods Hole, Massachusetts

GENERAL: The meeting was brought to order at 0910 by R. Corell, Chairman. T. Stetson reviewed the agenda item by item. The numbered paragraphs below are keyed to the agenda items. It is included here as Appendix I.

As was the case last year, the panel used individual packets of flash cards to signal their ranking of the proposals before them when the vote was called for. This avoided members being prejudiced by previous voters as could be the case when votes were conducted verbally.

Members of the Review Committee and others present are listed in Appendix II.

1. REPORT ON PREVIOUS YEAR'S SEASON: ALVIN's Operations Manager, J. Donnelly gave an illustrated account of the 1979 and 1980 (to date) season. His viewgraphs and text are found in Appendix III and include a cost summary.

The group gave Donnelly a vote of thanks for a job well done.

2. REVIEW OF PROPOSALS: The UNOLS Office had previously circulated a packet of proposals to each Committee member well prior to the meeting. Consideration of these consumed most of the two-day period and a summary of them, with a brief note on Committee action, appears as Appendix IV.

During the meeting J. Donnelly prepared three possible 1981 schedules taking into account the Committee's recommendations, weather, logistics, transit time, etc. The tentative schedule appearing in Appendix V is a distillation of the above three, subject to the same constraints, and attempts to give supporting agencies approximately the same number of days they traditionally support in any one dive season. It is emphasized that it does not have approval of the funding agencies and indicates "use days" which do not necessarily guarantee an identical number of dives. In some cases the Committee recommended fewer dives than were requested.

3. SUBMERSIBLE SCIENCE STUDY: T. Stetson recounted some history as to how the study came about; it stemmed partly from the previous ALVIN Review Committee's feeling it did not have the expertise to conduct such a study. W. Ryan, project leader for this study, gave a progress report. This past summer he admitted they had been deflected from the purpose of assessing the short and long term future of the ALVIN/LULU system by a look at requirements for a shallow system. A portion of the panel, headed by R. Cooper, may file a minority report on the necessity for a shallow submersible.

He said the final report would probably be available sometime later this year and that ARC would see it. He asked for ARC's consideration of the question as to whether the report should address shallow depth needs (<1000m) or be restricted to deep ocean, the mode traditionally supported by NSF and ONR.

4. FUNDING AGREEMENT: 1980 marks the final year of the three-year agreement by NOAA, NSF and ONR funding ALVIN/LULU. K. Kaulum said a new document was being drawn up with basically the same features as before.

However, an evaluation of the program is called for and, as a part of that a summary of the salient features of the past three years was called for. Woods Hole, as operators, appeared to be the best source for such a summary.

5. PREVIOUS MEETING REPORT: The secretary had incorporated all comments received and the report of the April 1979 meeting was voted accepted.

6. REVIEW COMMITTEE TERMS: The terms of Drs. Corliss and Turner expire this June. A. Maxwell observed the Committee was largely comprised of ALVIN users and that maybe non-users should be sought. Four candidates for each position were proposed to replace the disciplines being lost by the retirees. The groups were each voted on and the secretary requested to contact the person receiving the most votes to see if he was willing and able to serve.

These names would then be voted on by the membership at the Annual Meeting.

7. ALVIN FLYER: The Committee was asked to review the text of the most recent flyer which advertises ALVIN's projected whereabouts and instructs the potential user how to apply for time on her.

The secretary distributed an updated mockup which was discussed. Slight modification was made to some text and the conditions under which an escort vessel is required were emphasized.

8. OTHER:

a. Foreign cruise obligations were briefly discussed by R. Dinsmore. The default by any investigator to meet his post-cruise obligations could jeopardize all subsequent cruises by other scientists. The Chairman and Committee agreed to back the operators in their quest for prompt submission of cruise reports and other data.

b. Mention was made of the new National Geographic Society film "Dive to the Edge of Creation" made at the Galapagos Rift area and East Pacific Rise at 21°N which shows the spectacular "black smokers" issuing from the vents.

c. D. Rhoads was elected chairman pro tem for the second day as C. Corell had to testify in Washington on behalf of Sea Grant. M. Wimbush sailed on KNORR so he was unavailable the second day.

d. The secretary wishes to thank J. Corliss and R. Turner, whose terms will soon expire, for their valued service to the Committee.

ALVIN REVIEW COMMITTEE MEETING

24-25 April 1980, W.H.O.I. Carriage House
0900 on 24th

DRAFT AGENDA

Report On Last Year's Season

A brief report will be given by J. Donnelly

Review of Proposals, 1980, '81, '82

The bulk are for 1981, Committee discussion

The Submersible Science Study

A progress report by Dr. Wm. Ryan, Project Leader

The Third Year of the Three Year Funding Grant

The Agreement calls for an evaluation by the supporting agencies,
UNOLS, W.H.O.I.

Acceptance of the April 1979 Meeting Report

The Secretary has incorporated all comments received

Two ARC Members' Terms Expire in June

The Nominating Committee welcomes suggestions of names, present
incumbents are eligible for reelection

The Committee Should Review Text of ALVIN Flyer

This will inform potential ALVIN users of its likely whereabouts

Other

PARTICIPANTS

The following were present for all or part of the meeting.

ARC Members (with terms)

R.W. Corell, Ch., UNH	7/76-6/82
R.N. Anderson, L-DGO	7/79-6/82
J.B. Corliss, OSU	7/77-6/80
J.M. Edmond, MIT	7/78-6/81
K.C. Macdonald, UCSB	7/78-6/81
D.C. Rhoads, Yale	7/78-6/81
R.D. Turner	7/77-6/80
M. Wimbush	7/79-6/82
A.E. Maxwell, <i>ex-officio</i> , WHOI	2/75-6/80

The year 1979 opened with ALVIN and LULU moored at Roosevelt Roads, Puerto Rico in a stand-down status for the holidays. The ALVIN crew rejoined in Panama for the start of diving operations.

Negotiations to gain diplomatic clearance from Ecuador for work within 190 miles of the Galapagos Islands were unsuccessful. The scientific effort was constrained to stay within international waters and port visits were rescheduled to avoid Ecuadorian territory. Thus, the three legs to the Galapagos Rift Zone were staged from Panama with the expense of additional transit time to the site. The scientific product of these expeditions was well outlined in "Dive To The Edge of Creation" a National Geographic television special which has had world wide distribution.

After transit from Panama to Mexico, two expeditions to the East Pacific Rise at 21° North were devoted to geophysical measurements. These dives utilized magnetometer, gravimeter and an impact sound source. It was during these legs that the very hot (350°C) vents were discovered and photographed.

Due to potentially severe weather along the Central American Coast in summer, the period from May to October was spent along the coast of California. A three week stand-down included Independence Day and provided time for

personnel to come home and relax after six months of intensive operations.

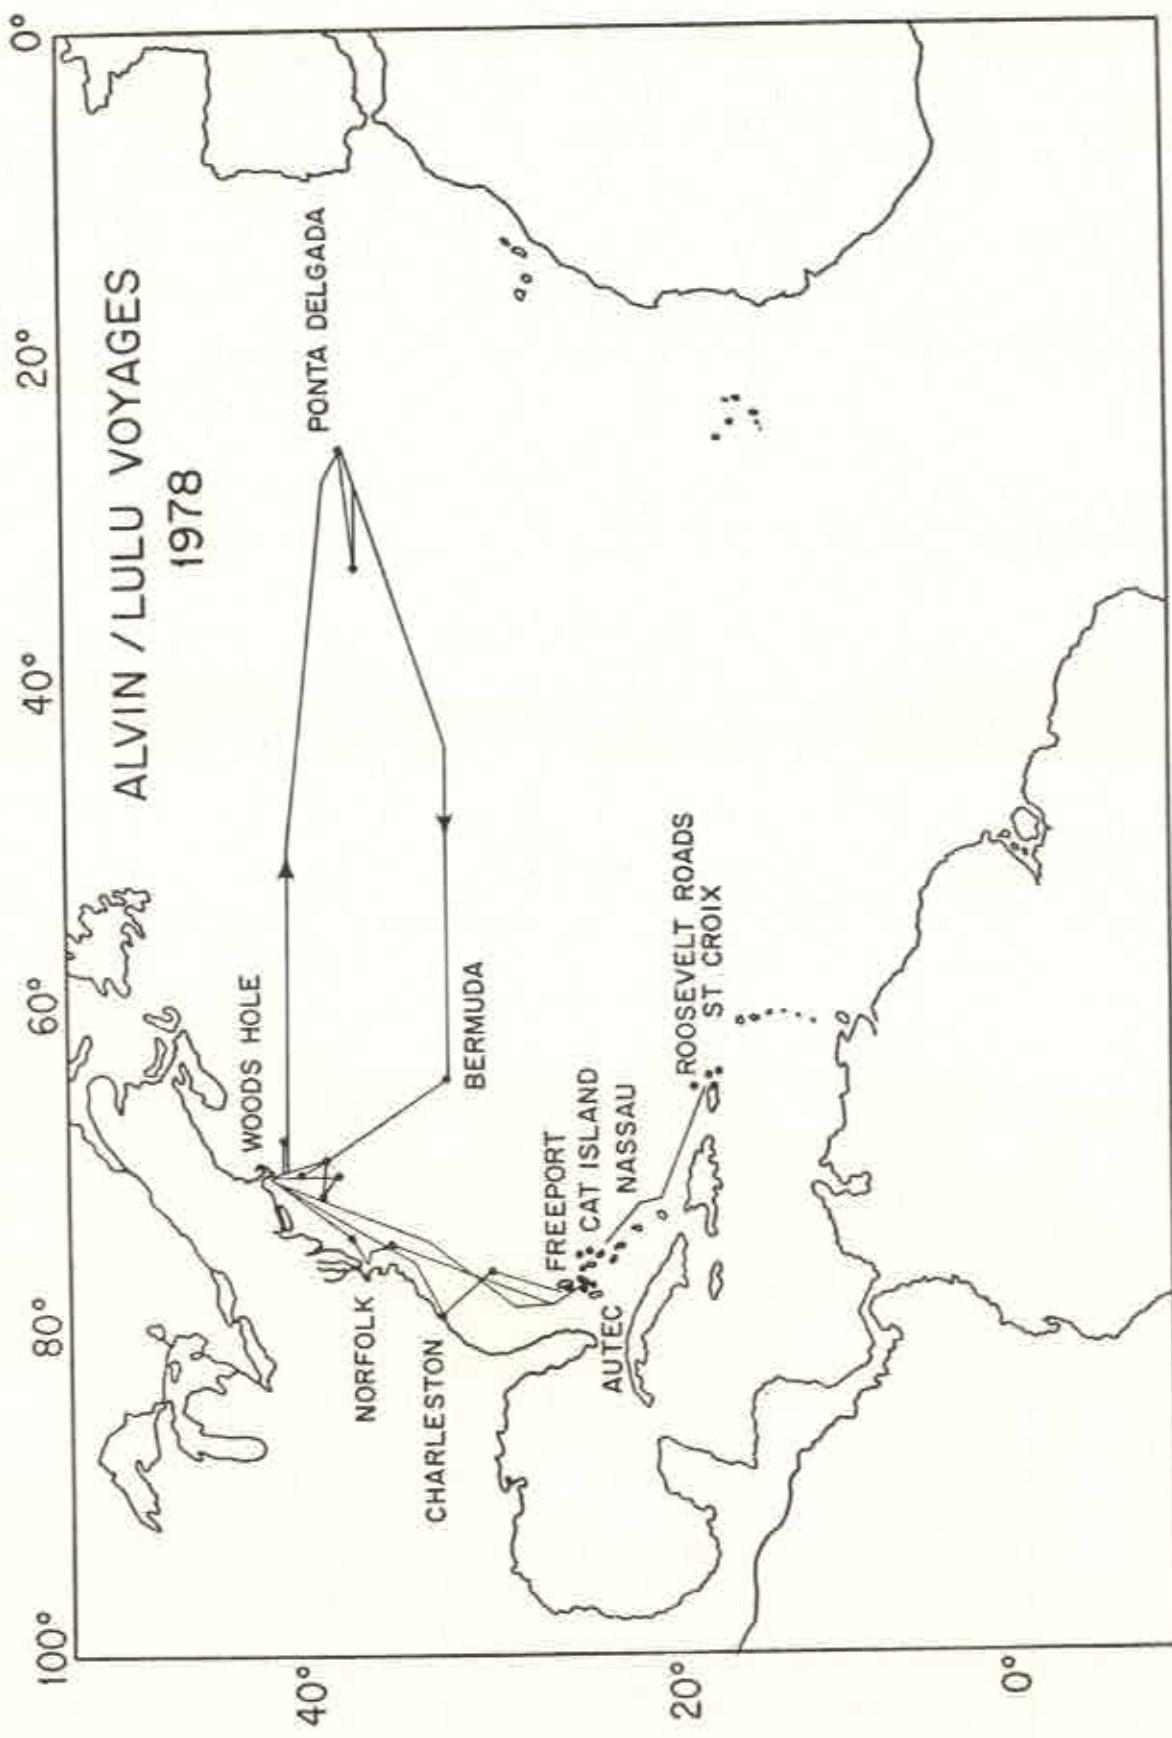

The five summer expeditions along the California coast were devoted to biology, geology and the DOMES project. LULU was dry-docked in Long Beach for routine underwater work, and some minor improvements, in September. ALVIN remained in San Diego for programmed maintenance.

The return trip to the U.S. east coast started on October 12. A geological expedition at the Tomayo Fracture Zone was followed by a five day series of dives in the hot vent area. These dives were for the purpose of evaluating equipment for sampling the high temperature mineral-rich water.

The final expedition of the year was a return to the Galapagos Rift Zone and was staged from Punta Arenas, Costa Rica to Panama.

ALVIN and LULU remained at the U.S. Naval Base, Rodman in Panama during the 1979-80 holiday season.

There follows a map of 1978 ALVIN/LULU Voyages, the Schedule as of September 1979, and a map of that year's voyages, a 1980 ALVIN/LULU Operations Schedule and map, as well as three-year operations and cost summaries.
