

## UNOLS Medical Evacuation Data

Ship	Start	End	Agency	Lost Days*	PCA - Medevac reasons
Kilo Moana	6/22/03	8/4/03	NSF	1	Science time was lost to equipment failure and a crew medevac. Approximately 8 hours of science was lost in order to locate the ship within helicopter range of land. The patient underwent successful quadruple bypass surgery in Anchorage.
Longhorn	3/16/03	4/5/03	Other/N/A	2	Two days were also lost due to ships's crew personal emergency at home. The science party was not charge for those days.
Maurice Ewing	4/13/03	5/10/03	NSF	0.15	Medical emergency. (Actual lost time not reported)
New Horizon	11/9/03	12/2/03	NSF	1.5	1.5 days lost for medical evacuaton of a crewmember in Manzanillo, Mexico.
Point Sur	5/14/03	5/23/03	NSF	1.5	We needed to med-e-vac a crew member due to an injury to a clinic in Santa Barbara, CA.
Thomas G. Thompson	9/19/03	10/15/03	NSF	6	Lost 6 days due to medical evacuation of one science party member.
Wecoma	1/19/03	2/9/03	NSF	0.46	Science time was lost due to a crew medical emergency, the patient was airlifted off and the vessel was required to return to port by the direction of USCG Group North Bend.
Wecoma	7/5/03	7/14/03	NSF,NOAA	0.5	We lost aprox 12 hours when we had to bring in a scientist to Seward, Alaska to be taken to the local hospital after tripping over a watertight sill. This cost us the loss of 1 night of zooplankton sampling which we could not make up.
