

# Remote Support and Access Discussion

## Discussion Points

- USCG C5I has cybersecurity requirements for the Polar Science Network Authority to Operate (ATO)
- Instrumentation systems and associated infrastructure must meet these requirements
- STARC has requirements for off-ship IT support for STARC technical staff
- Progress has been made by C5I and STARC on characterizing these issues
- Higher level dialog between NSF and USCG needed
- Significant driver is the transformative capability of Starshield

## AICC Input

- Science Mission needs for off-ship expertise to access instrumentation
- Examples include UHDAS, Guest Instrumentation
